COMPETITIVE ADVANTAGES

Easy to Read Hour Meter

- Hour meter displays run hours at all times, whether the engine is running or not. No switches to change to read the hour meter when the engine is not running.

Large, Raised Fuel Cap

- Easier to re-fuel from any direction vs. small recessed cap.

Battery Access Plate

- Battery can be accessed by removing a plate vs. a back panel that must be removed to replace the battery.

Miller and Bobcat are registered trademarks of the Miller Electric Company.
